Promac Welded Steel Drag Chain is your answer for a long wearing chain to convey or drag product through its full process. The product being conveyed can be abrasive because the heat treatment and material used on Promac Chain will allow the chain to have long wear life.

These chains match the best combination of:
- Raw Material
- Press Fits
- Heat Treatment
- Quality Control Procedures

Promac welded steel chain is designed and manufactured to withstand punishing shock loads and abrasive conditions. Key qualities are:

- Barrels are manufactured from high-strength steel and welded to sidebars using automatic welding equipment.
- The rivet pins are swedged with a very generous head. This allows for longer wear when being used in an enclosed area that sees abrasion from rubbing.
- Chains are available with a variety of attachments and ideally suited for field welding.
